

Lab 5
Makayla Mayne

```
11 //go to sms screen
12 const NavigateToSMS = props =>{
13   | props.navigation.navigate('SendSMS');
14 }
15
16 //Home Component
17 const HomeScreen = props =>{
18   | return (
19     | <View style={styles.container}>
20     |   <Text>Send my Info m_mayne139376</Text>
21     |   <Button title="Email my Info" onPress={()=>NavigateToEmail(props)}></Button>
22     |   <Button title="SMS my Info" onPress={()=>NavigateToSMS(props)}></Button>
23     | </View>
24   | );
25 };
26
27 export default HomeScreen;
28
```

> Response

React navigation is used to navigate through the screens. ^
